

PRODUCT DETAILS SILK & CLEAN

The Product

Silk & Clean effectively removes stains from silk.

Contents

alcohol

Packaging

Wet Wipes 2.5 ml of fluid

Handling & Storage

See the date stamped on the pad

Instructions for use

1. Remove pad from sachet. Do not unfold the pad.
2. Wet the stain. With the folded pad, rub the stain firmly and quickly, working outwards and away from the centre of the stain in all directions.
3. To avoid leaving ring marks, continue with this wiping away action, working the damp area into the dry area. The pad may be turned and refolded during this process until the solution has completely evaporated (approx. 2-3 minutes).
4. Repeat if necessary.
5. For water-based stains such as coffee, tea, soy sauce or ketchup, wipe first with a dampened cloth to dissolve colorant and finish off with Silk & Clean.

NB. Silk & Clean is totally effective on most stains however, due to the complexity of some staining, dry cleaning may still be required. Silk & Clean will not impede any later dry cleaning process.

For satin finishes, delicate or light coloured fabrics, test on a concealed area for suitability.

Composition

Silk & Clean includes the following ingredients, presented in descending order according to the EU's laundry & cleaning regulation. Ingredients listed by its chemical name or INCI name (International Nomenclature of Cosmetic Ingredients).

Alcohol

Isopropyl Alcohol

For further information on INCI, see:
